NavNet Announces World's First Home Automation System Integrated with Netflix

CALGARY, Alberta – December 3, 2010 – NavNet Inc., (“NavNet” or the “Company”), a premier provider of home automation solutions, today announced that its home automation controllers are now fully integrated with Netflix. NavNet customers can now browse Netflix movies directly from their NavNet touch screens or mNavNet application on their smartphone or iPad. Without the need for additional hardware, NavNet customers can also select and watch Netflix movies on any TV just as they would from their personal movie collections.

"This is another demonstration of the powerful architecture of the NavNet platform," said NavNet's Founder and President, Nav Dhunay. "NavNet brought to market the world's first home automation applications for the iPhone, BlackBerry and Android phones. We have now brought another innovation to market by introducing full integration with Netflix."

NavNet's integration with Netflix is a seamless solution for NavNet customers to browse, select and watch movies. NavNet's Netflix solution provides the same rich graphical content and movie metadata as its existing movie application. NavNet is the only home automation solution integrating with Netflix.

"Netflix is the leader in online movie rentals. Having our solution integrate with Netflix significantly strengthens our value proposition," said NavNet's CEO, Bharat Mahajan. "NavNet is developing a reputation for being the leader in introducing innovative new features into its solution. I am proud of our team for keeping us on the leading edge of technology."

About NavNet Inc.
